From Routledge : New Approaches to Medieval Architecture (AVISTA Studies in the History of Medieval Technology, Science and Art) before purchasing it in order to gage whether or not it would be worth my time, and all praised New Approaches to Medieval Architecture (AVISTA Studies in the History of Medieval Technology, Science and Art):

This collection of essays presents the exciting and innovative work being done in the field of medieval architectural history by scholars affiliated with AVISTA, one of the most active sponsors of such research in the Anglo-American scholarly community. These studies constitute a snapshot of the range of new interpretive strategies being deployed by researchers in the reassessment of previous scholarship and identification of new modes of inquiry. In recent years, the study of medieval architecture has been transformed by the emergence of new critical perspectives and new technologies. The contributors to this book are among those at the forefront of these developments. Several of the essays present dramatic reinterpretations of canonical monuments including the Abbey of Saint-Denis, Beauvais Cathedral and Notre-Dame in Paris. Others consider broader methodological issues such as the applications of geometry, workshop practice, and the shaping of historical narratives. Still others demonstrate how high-tech scanning and visualization methods can enhance our understanding of construction methods and the behavior of buildings. The publication of this collection of pioneering essays should foster further exploration by clarifying the state of research, by establishing specific historical arguments, and by providing models of inquiry to inspire emerging scholars.

'... a fascinating collection covering such an array of approaches that it is bound to appeal to a wide range of interests in architectural history. It challenges in very productive ways our assumptions about architectural history, provoking further research questions for the study of buildings.' Parergon '... this new AVISTA book is one of the most fruitful and challenging publications on the subject in the last decade...' Canadian Journal of History
About the Author Robert Bork is associate professor of art history at the University of Iowa, USA; William W. Clark is professor in the Graduate Center, CUNY, USA; Abby McGehee is associate professor at the Oregon College of Art and Craft, USA
