From Birkhäuser : Nexus Network Journal 11,3: Architecture and Mathematics before purchasing it in order to gauge whether or not it would be worth my time, and all praised Nexus Network Journal 11,3: Architecture and Mathematics:

Baroque architect and mathematician Guarino Guarini is the subject of this issue of the Nexus Network Journal. A group of international scholars were invited to contribute papers that shed light on the unanswered questions in several areas: Baroque architecture in general and Guarini's architecture in particular; philosophy; history of structural mechanics; mathematics and history of mathematics, cosmology. As always, the NNJ takes an interdisciplinary

approach to the broad range of subjects that Guarini concerned himself with, thus the final results will add significantly to our understanding of how Guarini's actual practical and technical processes were informed by knowledge of his multifaceted scientific and philosophical interests.
