By Searcher  
I have had a D60 for about 10yrs. ...finally saw the D5500 at a price I could afford. I started working with it and realized this is similar...but does so much more....so I quickly ordered this book...this book was laid out well, and a huge help....my only complaint with this book is , it would help to put some numbers in a few examples, instead of 'it depends on....'! Some basic info ...would help get started . Example: when shooting in low light , how slow and aperture speed can you use? ...no info ....I found that the experts say to start at no less then 1/60 sec. So at least I had a place to start...Otherwise, the book was great, and I still use it as I try other , more advanced processes.
