From Routledge : **Occupying Architecture: Between the Architect and the User** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Occupying Architecture: Between the Architect and the User:

Occupying Architecture focuses on the importance of the user of architecture. It emphasises the cross-currents between design, theory and use, and the need for a wider cross-cultural approach to architecture. Beginning with the architect, the book proceeds to explore models for architectural practice that actively engage the issue of use, and concludes with examination of the user. The authors draw on illustrations and examples from London, Las Vegas, Barcelona and Bruges to discuss how and why architecture ignores the user. The apparent contradictions between the 'producer' and the 'product' of architecture are highlighted before the activities of the architect and the actions of the user are explored. This book illustrates that architecture is not just a building: it is the relation between an object and its

occupant.
