got this book last week and I cant put it down. Many subjects and each are done in several ways to draw and sketch them. Basic but detailed, I'm really glad I got this book. Love the birds and landscape stuff.

For every artist who longs to capture the beauty of nature on paper, here is clear, concise instruction on creating true-to-life drawings. Author Frank Lohan, an experienced teacher, stresses perceptive study and analysis. His numerous examples illustrate how to discover the underlying geometric shapes of natural subjects, and they show how to develop sketches that form the basis of realistic compositions. Beginning and advanced artists as well as wildlife enthusiasts will appreciate these 600 images of birds, flowers, trees, animals, reptiles, and amphibians. Step-by-step methods, explained in simple terms, offer guidance on selecting tools and materials; creating perspective drawings; employing pencil, pen, and charcoal techniques; and other approaches.
